Toyo Proxes 4 – 265/25ZR30 99W

Toyo Tire U.S.A. Corp. (Toyo) is introducing the above passenger car tires for a specific passenger car market segment popularly known as “Hi-Risers.”

Important!

Do not use these tires on pickup trucks or SUVs. They are not designed for such applications. The tire load capacity requirements of these vehicles may exceed the load capacity of these passenger car tires.

General Advice for Determining Correct Inflation Pressure:

Optional, or “plus size” tires, including the subject tires, may require higher inflation pressures than what is indicated on the vehicle’s Tire Information Placard or in the vehicle’s Owner’s Manual. Any optional or “plus size” tire should provide equal or greater load capacity (by inflation) compared to the originally installed (O.E.) tires. Always refer to tire industry load & inflation tables² to determine correct inflation values when installing optional or “plus sizes”, or contact Toyo for assistance.

WARNING!

Observe this advice to avoid overloading the tire. Tire overload will contribute to tire fatigue and eventual tire failure. Tire failure may lead to possible injury or death.
